The Conclave—Great Excitement on "Change"—Startling Development.

Special to the Graphic.

Chicago, Aug. 27.—Chicago's great boom has come and gone and quiet once more reigns since the departure of the 300,000 visitors which thronged our streets. Among the other notable guests, we note the presence of Mr. B. F. Lamkin of your city. Great excitement was developed in commercial circles when it was discovered that he had secured one of the largest country stocks ever purchased in this city, and had chartered all the available cars to be had to rush them along to your town. The whole thing was done so quickly that no rise in prices occurred till the goods were filed. It was a masterly stroke and one which will give him the inside track over all competitors. His purchases covered the whole range of the market and every line of standard goods as well as the latest home and foreign novelties.

Nor.—Mr. Lamkin's long experience and well known taste assures a display of the very finest and best selected stocks of goods ever exhibited. Visitors to the Re-union should not lose this opportunity to call and see him and his mammoth stock.

The Graphic now booms to the tune of over twelve hundred and the cry is still they come.

The tales of interested parties to the contrary notwithstanding, he it known THE GRAPHIC is here to stay. It is a permanent institution and proposes to hold its position against all opposition, by the very simple means of making a better newspaper than its competitors. This is a better plan than gadding about telling folks that they cannot live very long, bound to go down, etc. We advise some of our contemporaries to try it.

We are republican from Principle, and advocate and work for the success of that party, because we believe it embodies the Progressive, Reformatory and Patriotic Spirit of the Country. We oppose Democracy because we believe it embodies the reactionary sentiment of the country, in all things anti-progressive, and with an innate tendency towards class and color prejudices and a covert opposition against the modern idea of Nationality and Free Schools, and a manhood ballot free to every citizen without regard to the accident of race or color.

Editorially we aim to treat all men and all topics with the candor they deserve, dealing with them fairly, justly and strictly on their merits.

We shall strive to build up a decent respectable journalism as contra distinguished from the coarse and grossly abusive style too common in many papers, believing that a journal which carefully expunges these defects from its pages will ultimately command not only the respect and confidence but also the patronage of the community in which it is published. This does not imply that good humored satire, and wit, and ridicule, may not be used at the proper time. For these are often powerful weapons in the cause of truth, and when properly and moderately used give zest to more serious argument.

The Graphic desires to be especially a family paper, one which will find a welcome in every home, and which parents can with confidence place in the hands of their children knowing that it will prove a valuable educational and moral aid in their training.
